NAPALI Single Passenger Foldable Touring Clear Kayak

We are proud to be able to say that our top model Napali is not only the sole transparent foldable kayak in the world, it is also among the very lightest, weighing only 26 lbs. The Napali masterpiece is an unrivaled blend of function and style. Voted by Fortune magazine as one of the 25 best outdoor products of the year and by Time magazine as one of the coolest inventions, it also won the prestigious SGMA award 'Sports Product of the Year', the Academy Award of the sporting goods industry.

The Napali is supported by a high-tech, durable and corrosion-resistant internal Carbon Kevlar frame system that comes equipped with a transparent military-grade Urethane skin, keeping the weight at a minimum. The leading-edge innovation allows the kayak to fold up small enough to fit into a hiking backpack, yet still offer the endless possibilities for discovery that transparent kayaks give.

SPECIFICATIONS

LENGTH:	13''
